**Subject:** RE: Draft Wabuska Drain (OU-7) FSAP

Dante,

My apologies for the late response, I was out most of this week and RTOC was also this week. It appears that the most important comment we had for OU7, actually sampling on the YPT Reservation, was not addressed. I had hoped to cover this in our call next week but realize from your email below you may have sooner deadlines.

I have to advise my client of the deficiencies in the current plan and would hope that EPA would direct the responsible parties to meet our earlier comments without additional actions from the Tribe. If you need to talk about this prior to our call on Friday, please let me know when you will be available earlier in the week and we will work to set something up.

I will continue to review the document but with no technical reason to limit the study to the non-Tribal area, we are very concerned that the scope of the project is another example of excluding the health and resource risk to the Tribal community while assessing exposure to the predominantly non-Tribal community. It is noteworthy that BP consultants/employees have been allowed access to Tribal property along the Wabuska Drain twice during the preparation and review of this document.

Dietrick

Agency team –

We have now had ARC's Wabuska Drain sampling plan for a couple weeks. As I have discussed before, my strategy is to get them moving on the initial sampling effort as specified in their July workplan, and at the same time work with the team on our overall strategy for the Wabuska Drain investigation, to ensure it ultimately meets our needs. If anyone has comments specific to the sampling plan (submitted in the transmittal below) that weren't already expressed in your comments on the July workplan, please get them to me by the end of next week (10/30).

At the same time, please review my draft strategy proposal (attached). In the attachment, I summarize the EPA DQOs and ARC's July workplan, identify what will be learned, what may be applicable to other parts of the drain, what will not be applicable to other parts of the drain, what work remains to be done, and possible strategies for approaching this work. I would like the agencies' input on this strategy before discussing with ARC.

I would like to arrange a conference call with you all to discuss the strategy. Please let me know your availability mid next week through the following week (October 28 through November 6). Thank you very much!

**Dante Rodriguez**
